GEORGE FRIEDMAN
FOUNDER OF STRATFOR

READ BY BRIAN EMERSON

“Predictions have made George Friedman a hot property these days.” —*Wall Street Journal*

“Stratfor is changing the way we think about news.”
—*American Spectator*

Dubbed by *Barron's* as “The Shadow CIA,” Stratfor, George Friedman’s global intelligence company, has provided analysis to Fortune 500 companies, news outlets, and even the U.S. government. Now Friedman delivers the geopolitical story that the mainstream media has been unable to uncover — the startling truth behind America’s foreign policy and war effort in Afghanistan, Iraq, and beyond.

GEORGE FRIEDMAN is the founder and chairman of Stratfor, the leading private intelligence company. Friedman is the author of four books and numerous articles on national security, warfare, and the intelligence business. A nationally recognized expert on intelligence and international geopolitics, he has appeared on all the major television networks and has been featured, along with Stratfor, in such national publications as *Time*, *Barron's*, *Wall Street Journal*, and *New York Times Magazine*.
