

### What dinosaurs teach us about survival

What if dinosaurs could help us prepare for the future? In *Surviving Climate and Chaos*, paleontologist and science communicator Evan Jevnikar reveals how the prehistoric past holds critical lessons for understanding modern climate change, extinction, and survival.

Dinosaurs weren't just ancient curiosities. They were vital parts of ancient ecosystems whose rise and fall mirrors many of the patterns scientists see in today's rapidly changing world. With a blend of cutting-edge science, fascinating fossil discoveries, and philosophical reflection, Jevnikar explores how the extinction of these giants can help us confront humanity's future.

From mass extinctions and ecosystem collapse to resilience and adaptation, this book makes the case that dinosaurs still have much to teach us. Whether you're a lifelong dino fan, a science fan, or someone curious about how Earth's past predicts its future, *Surviving Climate and Chaos* is an essential and captivating listen.

If you liked *The Rise and Fall of the Dinosaurs*, *Locked in Time*, or *Weird Universe*, you'll love *Surviving Climate and Chaos*.

**Evan Jevnikar** is a paleontologist and science storyteller whose work centers on dinosaur growth, anatomy, and survival strategies. He earned his MS in Biological Sciences from NC State University, where he studied tyrannosaur tooth morphometrics and growth patterns, after completing a geology degree at the University of Kansas. As "Dinosaur Guy," Evan connects with a broad audience through social media, translating cutting-edge paleontological findings into accessible content across TikTok, Instagram, and Threads.
